Complete, inspired design solutions

Suspended Ceiling Rafts are an innovative way of absorbing sound as well as enhancing the design flare of a room. The floating impression is modern and contemporary in any environment, there are endless design possibilities, with colours and shapes. These panels offer sound absorption performance not only from the face of the panel but also from the rear. These panels are classified as a " Class A " Absorber enabling areas where it is used to achieve the highest level of absorption. Ceiling Rafts are available in Square , Rectangular , Triangular , Circular , Elliptical and Cloud, shaped. All available in the complete Camira Lucia range of fabric.
